

Flow Monitor

B3000 Series

DESCRIPTION

The B3000 Series flow monitor is a flexible, durable, easy-to-use platform for your flow metering applications. Our trusted flow metering technology now offers a new flow monitor with more options and features than ever before with the B3000 Series.

OPERATION

This monitor is capable of accepting low-level frequency input signals typically found in turbine flow sensors. The output signal for these type of sensors is a frequency proportional to the rate of flow. The B3000 monitor uses the frequency information to calculate flow rate and total flow. Through the use of the programming buttons, you can select rate units, total units and unit time intervals among other functions. If required, the flow monitor can easily be reconfigured in the field. Finally, you can choose between simultaneously showing rate and total, or alternating between rate and grand total.

The monitor is available in three levels of functionality and two packaging options. The base model provides all the functions necessary for the most common flow metering applications. The advanced version adds communications capabilities over an RS485 bus using Modbus RTU and control outputs. The third version is a solar-powered model (NEMA 4X only).

Packaging options include a polycarbonate, NEMA 4X version and an aluminum explosion proof enclosure.

APPLICATIONS

The B3000 monitor is suitable for application in a wide variety of metering needs. A few of the more common industries are:

- Secondary oil recovery applications
- Remediation and reclamation
- Fracture/refracture
- Coal bed methane
- Regulatory compliance and environmental accountability
- · Industrial chemicals
- Aggressive chemical processing applications
- · Semiconductor manufacturing
- · Fertilizer production and dispensing
- Pesticide manufacture
- · Liquid batching and water cooling

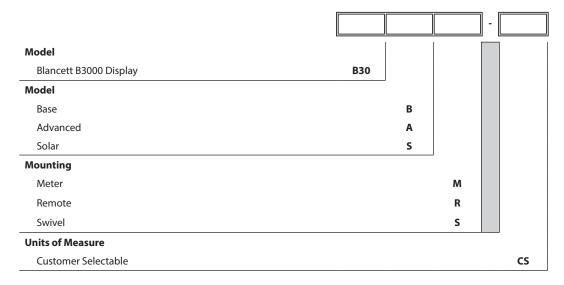

FEATURES

- Robust alarm parameters provide faster warning when something changes in the process or pipeline.
- Greater control and greater visibility of batch operations.
- Advanced connectivity options allow you to connect meters to your network for remote monitoring and process automation capabilities.
- Solar, battery, and 4...20 milliamperes loop power options provide the ability to install in a remote location and be up and running immediately, maintain readings and settings during power loss, and a battery life up to 8 years.
- Updated display and totalization options provide more flow information, including simultaneous display of rate and total as well as standard, batch and grand totals.
- Various mounting and enclosure options provide a B3000 model for your operation.

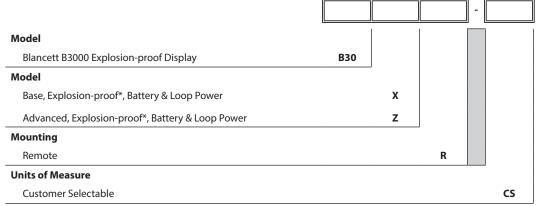

PART NUMBER CONSTRUCTION

Blancett B3000 Display

Blancett B3000 Explosion-proof Display

^{*}For hazardous locations, the monitor must be installed on an explosion-proof rated meter. To maintain compliance, kit P/N B280-737 for meter mounting is required.

SPECIFICATIONS

		Simultaneously	shows Rate and Total		
	Common	5 x 7 Dot Matrix LCD, STN Fluid			
		6 Digit Rate, 0.5 inch (12.7 mm) numeric

MOUNTING STYLES

Meter Mount

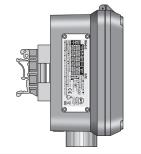

- Monitor is assembled to the flow meter, creating a compact flow measurement system.
- NEMA 4X (IP 66) enclosure.

Remote Mount

- Ideal when monitor needs to be located away from flow meter. Suitable for high temperature, excessive noise or inaccessible areas.
- NEMA 4X (IP 66) enclosure.
- Panel, DIN rail, and pipe mounting hardware included.
- Cable lengths from 10...100 ft (3...30.5 m) sold separately.

Swivel Mount

- Capable of adjustment pivot of 180 degrees for ease of viewing.
- NEMA 4X (IP 66) enclosure.
- · Remote Swivel mount also available, consult factory for details.
- Offers additional protection from elements.

Explosion Proof

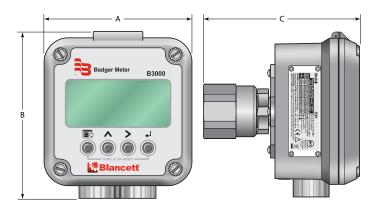

- Ideal for hazardous locations.
- NEMA 4X (IP 66) enclosure.
- · Rugged compact design.
- Remote or meter mount.
